Tables

April 1999

The 1996 Forest District Tables

This set of tables was produced for the Ministry of Forests as a supplement to *1996 British Columbia Local Area Economic Dependencies and Impact Ratios*. The same database and methodology have been utilized except that the results are for forest districts rather than the local areas defined in the main report.

Tables 4, 5, 6, 7 and part of Table 3 correspond to the tables in the main report and more detailed descriptions of their contents may be found there. The remaining tables provide additional information about employment and income in each of the forest districts.

The 1996 Forest District Tables

TABLE 1	Basic Sector Employment Estimates: employment estimates by sector and, for each basic sector, the percentage of total basic employment.
TABLE 2	Before Tax Income Estimates: before tax income estimates by sector and, for each basic sector, the percentage of total before tax income.
TABLE 3	After Tax Income Estimates: after tax income estimates by sector and, for each basic sector, the percentage of total after tax income. These percentages are analogous to the dependencies in Table 3.1.1 of *1996 British Columbia Local Area Economic Dependencies and Impact Ratios* (96BCED).
TABLE 4	Employment Ratios - No Migration (with Safety Net): the potential impact (direct, indirect and induced) on the local economy of the gain or loss of one job in a basic sector. In the No Migration scenario it is assumed that displaced workers receive employment insurance benefits and that new jobs are filled by previously unemployed residents. This table is analogous to Table 3.2.1 of 96BCED.
TABLE 5	Employment Ratios - Migration (no Safety Net): It is assumed that displaced workers leave the local area and that new jobs are filled by in-migrants. This table is analogous to Table 3.2.2 of 96BCED.
TABLE 6	Indirect Employment Ratios: direct plus indirect impacts. This table is analogous to Table 3.2.3 of 96BCED.
TABLE 7	Nonbasic Income Ratios (Table 3.3.1) and Average Nonbasic After-Tax Income (Table 3.3.2).
TABLE 8	For each forest district, direct , indirect and induced Employment and After Tax income estimates by industry sector.
APPENDIX A	Each forest district is made up of census subdivisions (CSD) or parts of CSDs. Appendix A lists the percentage of each CSD that is in a forest district. For example, the Mid Coast forest district is comprised of 100% of Central Coast Subdivision A and 3% of Kitimat-Stikine Subdivision D.
